Full right to work in Ireland, no visa sponsorship required

SUMMARY

React Native developer with 5+ years building and shipping iOS and Android apps, and 7+ years in software development. Delivered healthcare, betting, auction and field-service apps to the App Store and Google Play, from new features to React Native upgrades and production crash fixing. Currently building a screen-time app on the React Native New Architecture with native Kotlin and Swift modules.

SKILLS

Mobile: React Native (CLI & Expo), New Architecture (Turbo Modules), iOS, Android, React Navigation, Reanimated, push notifications, deep linking, offline storage, camera (VisionCamera)
Languages: TypeScript, JavaScript (ES6+), Kotlin, Swift (native modules)
State & data: Redux Toolkit, React Query, Zustand, MMKV, REST APIs, GraphQL, WebSockets, SQLite
Web & backend: React, React Admin, Node.js, NestJS, Express, GraphQL Subscriptions, MySQL, MongoDB
Testing & tools: Jest, ESLint, Husky, Firebase (Auth, Crashlytics), App Store Connect, Google Play Console, Git, Docker

EXPERIENCE

Relocation to Ireland and personal projects
01/2026 – present | Dublin, Ireland

- Moved to Dublin; taking English classes.

Keept (FocusGuard) – screen-time app, github.com/DMihail/FocusGuard

- Building a cross-platform app that tracks distracting apps, warns before limits and blocks them, on React Native 0.87 (New Architecture), React 19 and TypeScript. Now in closed testing on Google Play.
- Wrote native code for both platforms: Kotlin foreground service, UsageStatsManager, overlay blocking and home-screen widget on Android; Swift Screen Time (Family Controls, DeviceActivity) extensions on iOS, connected through a Turbo Module.
- Set up Zustand + MMKV storage, Reanimated charts, i18n (EN/RU), Firebase Crashlytics, and a quality gate with ESLint, Prettier, TypeScript and Jest (130+ tests).

Nudge – gamified to-do app, github.com/DMihail/Nudge

- Building with Expo, Expo Router and Zustand; learning Kotlin and Jetpack Compose for a planned Wear OS companion app.

React Native Developer (Contract) | Elementica
03/2025 – 12/2025 | Uzhhorod, Ukraine

Vitadrop (healthcare app)

- Built core features of a healthcare app in React Native and TypeScript: Firebase Authentication, REST API integration and push notifications.
- Added camera capture with VisionCamera and image analysis with OpenCV, including native iOS and Android SDK integration.
- Prepared and shipped releases to the App Store and Google Play.

Vidalytics (video analytics platform, React)

- Built analytics dashboards and video player settings, working with product managers and designers in Agile sprints.

React Native Developer (Contract) | NetGame
06/2024 – 01/2025 | Kyiv, Ukraine

- Developed features for BetKing Casino & Sportsbook and 777 UA Casino on iOS and Android.
- Triaged and fixed top production crashes found in Firebase Crashlytics.
- Supported regular release cycles and post-release monitoring.

Full Stack / React Native Developer | Kultprosvet
03/2021 – 12/2023 | Dnipro, Ukraine

Waddingtons Auctions (Expo, React Native)

- Moved live auction features from the web platform to new iOS and Android apps and supported them for two years.

Amako (field-service app)

- Upgraded the app from an outdated React Native version to a modern release while keeping releases running for field engineers.
- Built offline data storage and real-time sync over WebSockets, so engineers could work without a connection.

Education platform (classroom focus app)

- Built a React Native app where teachers start a lesson and students join it; once joined, an on-device VPN blocks social media (Instagram, Facebook and others).
- Built and maintained the NestJS, GraphQL and MySQL backend with GraphQL Subscriptions for real-time classroom control, and a React Admin panel for teachers.
- Took part in code reviews, sprint planning and estimation, and mentored junior developers.

Junior React Native Developer | Devsteam.mobi
03/2020 – 03/2021 | Kyiv, Ukraine

- Built audio playback and offline downloads (SQLite) for an audiobook app, with REST API sync.

JavaScript Developer | Absolutist
09/2018 – 07/2019 | Dnipro, Ukraine

- Migrated browser games from ActionScript to JavaScript and TypeScript.

EDUCATION

Master's Degree in Systems Analysis, Oles Honchar Dnipro National University, 2021
Bachelor's Degree in Systems Analysis, Oles Honchar Dnipro National University, 2019

LANGUAGES

Ukrainian (native), English (intermediate)
